Currently, start to enjoy reading **How Animals See The World: Comparative Behavior, Biology, And Evolution Of Vision From Oxford University Press** as well as get your new life!

## Review

"This is a serious book covering a complicated but fascinating topic. I recommend it for the serious reader, whether researcher, teacher, or student, who wants to know more about how animals see the world in all of the ways that seeing can be defined. This is a book that would certainly merit a spot on the bookshelf of comparative and evolutionary psychologists as well as behavioral and evolutionary biologists, as there is much in here to appreciate for each of these groups." -- Michael J. Beran, *PsycCRITIQUES*

"This deep yet fascinating book is not quite what it seems from the title. Rather than "How Animals See the World," it should be "Visual Psychophysics of Birds and Primates." Ninety-eight percent of animals are invertebrates, and 85 percent of habitable space is aquatic; both are little represented here, though the salticid spiders and honeybees make an interesting contrast to vertebrate vision... The final section, on evolution of the vertebrate visual system's structures and basic physiology, belongs first as a foundation. Nevertheless, the book is fascinating reading for the specialist in perception and the cognitive neuroscientist, though not the beginner. Summing Up: Recommended. Graduate students and researchers/faculty." -- J. A. Mather, University of Lethbridge, *CHOICE*

## About the Author

Olga F. Lazareva is Assistant Professor of Psychology at Drake University. Her research concentrates on behavioral and neurobiological aspects of visual perception and relational learning in humans and nonhuman

animals.

Toru Shimizu is Professor of Psychology at the University of South Florida. His areas of research include the neural basis of vision and cognition in animals.

Edward A. Wasserman is Dewey B. and Velma P. Stuit Professor of Experimental Psychology at the University of Iowa and coeditor with Thomas Zentall of *Comparative Cognition: Experimental Explorations of Animal Intelligence* (Oxford University Press, 2006). He is a member of the Delta Center at the University of Iowa, dedicated to the investigation of learning, development, and change. Wasserman's research has centered on learning, memory, cognition, and perception in humans and nonhuman animals.
