Review

“An extremely ambitious attempt to explain the history of humankind. Thompson’s historical materialism provides him with a reliable compass on his journey and the end result is nothing short of inspiring.”

(Stefan Berger, Ruhr-Universität Bochum, Germany)

“Willie Thompson has written an engaging and concise world history that is both analytically ambitious and lucidly argued. It’s an excellent discussion of many complex questions which should be of interest to both undergraduates and the general reader.”

(John Callaghan, University of Salford)

“Willie Thompson reminds us all of the power of a master narrative written in the now all-too-rare tradition of all-encompassing erudition that impresses and inspires, informs and provokes. A powerful book derived from decades of historical research and reflection on the essence of what it is to be human. A must-read.”

(Dianne Kirby, University of Ulster)

“The history of civilization has enjoyed a renaissance of late. Historians grapple with civilizations’ clashes, their defense and their erosion. This book is, therefore, a welcome addition to the history of change in the global human condition and situation. By tracing and analyzing human relationships within the framework of work, sex and power, civilization’s ‘fabric of history’ unfolds to illustrate clearly the rise and fall of different forms of social, political and economic organization.”

(KAJ McLay, Canterbury Christ Church University)
