## **Review**

"Those familiar with Robert F. Stock and his work will have been anticipating this book with some relish. He has set himself a huge task, and this he has achieved with considerable success and some panache. Stock's analysis is considered and consistent, his material is bang up to date, and his illustrations are well prepared and copious. The severe lack of textbooks on Africa has created unmet demand for a book like this. Recent additions to the literature have tended to be either collections of contributions or relatively small volumes, but this book is in the big tradition of Hance, Harrison, Church, Morgan and Pugh, Mountjoy and Embleton-the standbys of the past generation. Africa South of the Sahara will prove valuable for the aware, intelligent layperson enquiring about Africa; for the undergraduate embarking upon a new regional interest; for the more advanced student of the continent as a source of information and analysis to be mined. It deserves to become a standard text for the human geography of Africa south of the Sahara in the 1990s. --Hamish A. C. Main, Ph.D., Division of Geography, Staffordshire University

"We've never had a geography of Africa text that examines the real issues of Africa's development crisis quite like this one does. Its comprehensiveness and balance are impressive. I found the approach fresh, informative, and provocative. It is written in clear prose, in a style that will give the text a long-life before a revised version is necessary. It includes chapters on patterns and processes affecting physical environments, salient social and cultural features, and an essential historical perspective to development and social change. Greatest emphasis is given to African economies and economic life, including a chapter devoted specifically to the extraordinary involvement and potential of women in development. The chapters on Africa's role in the world economy, relations of ideology and development, and development from within are important and welcome features that give this book particular relevance and enable it to stand apart from other geography texts on this region. Features that faculty and students will both look forward to using include well-chosen and written vignettes in each chapter, effective introductory essays at the start of each major section of the text (e.g., Africa in Historical Perspective, Dynamics of Population, Urban Economies and Societies, Resources). Also, the suggestions for further reading have been carefully chosen for each chapter. The text carries the earmarks of a thoughtful scholar who is personally well-acquainted with the complexities of trying to interpret contemporary Africa. I think Bob Stock succeeds admirably where no one else has for many years. This really will be a welcome text for courses on Africa! We've had a long drought." --Charles M. Good, Ph.D., Professor of Geography, Virginia Tech

"Robert Stock offers us a stimulating book on the geography of Sub-Saharan Africa (SSA). Using a thematic and analytic approach, the author not only points to the various factors that have contributed to SSA's deepening crisis but he also points out the seeds of hope' that lie ahead in the region's vast potential. This is a well-balanced work that explains SSA's contemporary realities in a synthesis of historical, cultural, social political, and economic perspectives on the region. The book should make an excellent text at the undergraduate level and a must background reading to academics, politicians and development administrators. The author has made an excellent use of vignettes, maps, and figures providing readers with a rich set of materials illustrative of the thematic chapters. Robert Stock renders a perspective long overdue on SSA's geography." --Assefa Mehretu, Ph.D., Professor of Geography and African Studies, Michigan State University
