### Review

Advance Praise: "Bonavia has written a masterly account of the domestication and adoption of maize in the New World based on hard science from many disciplines. Although likely controversial to some specialists for his bold thinking, his book is a welcome dose of fresh ideas about the early history of one of the world's most important food crops. Up -to -date, balanced, and based on the latest research, this work is the best summary of the subject by a Latin American scientist in a generation and can be recommended to anyone interested in ancient food production." - Tom D. Dillehay, Vanderbilt University

"Maize is a major achievement and a capstone of a stunning career. It is an indispensable source for anyone interested in the domestication of grains in prehistory." - Charles Stanish, Cotsen Institute of Archaeology at UCLA

"...Bonavia offers us the best summary of the latest research on corn agriculture, some of which may be very controversial, including his interpretation of its origins. Everything you want to know about ancient maize is found in this extraordinary study." --American Archaeology

### About the Author

Duccio Bonavia held professorships at Universidad Nacional Mayor de San Marcos, Universidad Nacional San Cristobal de Huamanga (Ayacucho) and at the Universidad Peruana Cayetano Heredia (Lima), before he retired in 2005.
