Review

'An elegant, erudite, and provocative book that asks us to reflect on suicide without moral judgment and panicked response. For Critchley, many reasons have been given for suicide, but what remains less remarked is how suicide distinguishes human creatures who grapple with melancholy in the face of losses that are too huge or enigmatic to fathom. Though there may be many reasons given within philosophy or popular culture, there are also some simple, insistent truths that do forestall such an action. In his view, "suicide saddens the past and abolishes the future," establishing a problematic framework for grasping the whole of a life. This text gestures toward what makes us forgetful about suicide: wondrous and recurring moments when we find ourselves "enduring in the here and now." - Judith Butler
